

FastClaw User Manual

Welcome to the FastClaw User Manual. This guide will help you understand how to navigate and utilize the FastClaw platform to its fullest potential.

1. Getting Started

To begin using FastClaw, you need to create an account. Navigate to the **Sign Up** page from the top navigation bar. Fill in your details and verify your email address. Once verified, you can log in to your dashboard.

After your first login, you will be guided through a quick onboarding process to set up your organization profile and select your preferred initial integrations.

2. Navigating the Dashboard

The main dashboard is your central hub for monitoring agent activity and system health. It provides:

- **Overview:** High-level metrics on tasks completed, active agents, and API usage.
- **Active Agents:** A live view of your currently deployed agents and their status.
- **Recent Activity:** An audit log of recent actions taken by your agents or team members.

3. Configuring AI Agents

FastClaw allows you to deploy specialized AI agents. To configure a new agent:

1. Go to the **Agents** tab in your dashboard.
2. Click **Create New Agent**.
3. Select the foundational model (e.g., OpenAI, Anthropic, Gemini).
4. Define the agent's persona, strict rules, and access permissions.
5. Click **Deploy** to instantly spin up the agent in your secure environment.

4. Integrations & Channels

Connect your AI agents to the platforms where you already work. FastClaw supports seamless integration with various messaging and productivity tools.

- **Communication:** Slack, Microsoft Teams, WhatsApp, Discord.
- **Productivity:** Google Workspace, Notion, Jira.
- **Custom API:** Connect to internal tools using our securely managed webhooks.

To set up a new integration, navigate to the **Integrations** page, select your desired platform, and follow the OAuth authorization flow. All credentials are encrypted using hardware-level security (AWS KMS).

5. Billing & Subscription

Manage your subscription, view past invoices, and monitor your current billing cycle usage in the **Billing** section. FastClaw offers Pro and Max tiers to suit different scales of operation.

If you exceed your monthly credit limit, your agents will automatically pause to prevent unexpected charges unless you have enabled auto-scaling add-ons.

6. Support

If you encounter any issues or have questions not covered in this manual, please visit our **Contact Us** page. Our support team is available 24/7 for Max tier subscribers.
